

TrakSafe™ Protector Pro

The Highest Level of Personal Safety

Workers in the field face safety risks every day, especially when working solo. Equip your workers with reliable location-based communication tools and assure immediate response in an emergency.

The Protector Pro, part of the TrakSafe range of personal safety devices, supports welfare monitoring and is a critical part of field worker safety, especially in high risk environments. Integrated with Smartrak's industry leading EyeQ™ mapping and reporting software, the TrakSafe Protector Pro offers seamless communication, location identification and alert management.

Benefits

- ✓ Pinpoints the location of your employees on the EyeQ map site facilitating a fast response in an emergency
- ✓ Covers multiple risk scenarios with intelligent cause and effect features
- ✓ Alerts monitoring staff upon SOS, man-down and timed check-in alerts
- ✓ Adds assurance and support to the person in distress via two-way voice communication function
- ✓ Provides peace of mind that help is on the way with alert receipt functionality

How it Works

- ✓ Sends an alert when the device tilts beyond 45 degrees (indicating a potential fall) or when the device is inactive for a prolonged period
- ✓ Timed check-in can be initiated if the user is going into a potentially dangerous situation or out of cellular reception coverage for a short period of time
- ✓ All alert types are communicated via the Smartrak EyeQ system which can be monitored in-house or by a 3rd party
- ✓ The device can receive voice calls, opening two-way voice communication
- ✓ Easy-to-use dedicated SOS button for manual notification of an incident
- ✓ The device sends a low battery event when it drops below 20% remaining life which is shown on the EyeQ reporting software and in an email/SMS

Key Features

- ✓ Small, light and robust; with an IP67 rating to facilitate use in all weather conditions
- ✓ Combination GPS and 3G ensures ability to quickly and accurately locate device position
- ✓ Polls every two minutes with more regular updates in emergencies
- ✓ Large 1350mAh Li-ion battery maximises operating time for up to 30 hours of use under standard operating settings
- ✓ Automated tilt and inactivity alerts to notify of man-down situations with an incapacitated operator
- ✓ Timer based check-ins ensure security of staff working in areas without reception
- ✓ Two-way voice over 3G/GSM for direct communication between operations centre and remote worker

Includes:

Protector Pro unit
USB Charging Cable
Charging Clip
Case with rotatable belt clip
3G cellular connection
