

# TrakSafe™ Spot Gen 3

Ensuring the safety of your lone workers operating in areas outside of cellular reception has become simpler than ever with the Spot Gen 3.

Introduced into the TrakSafe range to provide a personalised solution to lone workers operating in areas outside of cellular reception. With the emergency alert button, the Spot Gen3 can trigger an emergency response anywhere with a clear view of the sky in Australia and New Zealand.

## Benefits

- ✓ Satellite communication ensures coverage anywhere in Australia and New Zealand – no cellular reception required.
- ✓ Manual SOS feature covers a wide range of emergency and at risk scenarios.
- ✓ Check-in feature enables updates of location when outside of cell reception.
- ✓ Manually activated breadcrumb of location ensures privacy of staff.
- ✓ Powered by consumer grade AAA Batteries that are easily accessible and allow for quick replacement by users in the field.

## How it Works

- ✓ Operates in standby mode until features activated.
- ✓ Breadcrumb manually activated to provide an updated location on the EyeQ map every 10 minutes
- ✓ Power saving mode automatically activates when unit isn't moving.
- ✓ Manually activated Help/SOS alert activated by the press of a button – sending notification to EyeQ map along with location.
- ✓ Check-in feature allows regular updates from the user of their status outside of cellular reception.

## Key Features

- ✓ Globalstar Satellite Network Coverage
- ✓ Button guard stops accidental alert activation
- ✓ Single button press to send a check-in (Appears on the EyeQ map with GPS location)
- ✓ Location updates stop when you stop moving, to preserve battery life
- ✓ Emergency activation sends an alert via Satellite with the location of the device
- ✓ AAA Battery powered for on the go replacement
