

# TrakWise™ OBD II

Low cost, no installation  
vehicle tracking

## Affordable, out-of-the-box vehicle tracking

TrakWise OBD II is a convenient solution for organisations that require basic vehicle tracking and a no-fuss, no-cost installation. The device easily plugs into the vehicle OBD II port and immediately starts communicating with Smartrak's EyeQ™ Visual Intelligence Suite. Quick and simple implementation gives you immediate fleet visibility and access to vehicle data.

### Benefits

- ✓ Simple plug-and play installation
- ✓ Zero vehicle Downtime
- ✓ Low Upfront Costs
- ✓ Stretches your investment across more vehicles within your fleet
- ✓ Fully integrated with Smartrak's EyeQ Visual Intelligence Suite for an end-to-end solution

### How it Works

- ✓ TrakWise OBD II plugs directly into a vehicle's OBD II port - no need for special tools or an installation service
- ✓ Data will begin recording as soon as the vehicle engine is turned on
- ✓ Includes a cellular modem and high accuracy GPS for reliable location and communication
- ✓ Map data and reports are instantly available on EyeQ

### Key Features

- ✓ EyeQ map visualisation show location, key on/off, and trip information including speed and direction
- ✓ Geofence entry and exit reporting
- ✓ Compatible with map tag functionality
- ✓ Comprehensive report suite including activity and trip reports, usage reports and driver behaviour\*
- ✓ Ultra-low power consumption
