

KeyMaster

Electronic, easy-to-use key management solution

Can any employee just walk up and take keys off a peg board? Or do you have a staff member responsible for handing out keys? Are your staff always looking for the pool vehicle keys?

Smartrak's key management solution not only provides a safe solution for your keys, it also ensures that vehicles are used in an approved and trackable manner.

The KeyMaster is an electronic key cabinet that conveniently centralises the management, storage and distribution of your pool vehicle and asset keys. The administration of keys is handled seamlessly via integration with Smartrak's PoolCar pool booking system and employee access to the keys is granted on authorisation and time-based rules.

Benefits

- Integrated with Smartrak PoolCar for seamless management of shared fleets
- Removes the need for manual key management and ensures keys are secure and accounted for
- Eliminates unauthorised use or cases of taking the incorrect keys
- Ability to store keys for non-tracked assets including tractors and mowers
- Scalable to accommodate any fleet size
- Information regularly synced with Smartrak, allowing for last minute bookings and changes

How it Works

- Create a booking via PoolCar
- Access KeyMaster up to 15 minutes prior to the booking with employee ID code
- Remove the indicated key for your vehicle or assets e.g. mower

Key Features

- Large, bright 7" touchscreen with easy to use interface
- Cabinets available to hold 25, 50, 75 and up to 100 keys
- Unique log in details required for each person
- Pin-hole camera for added security when keys are removed from the KeyMaster
- Integrated battery-backup power supply to support business continuity

- Depart with your booked vehicle or asset
- Return key to KeyMaster using scanner & fob on keyring
