

InReach SE+

Rugged, satellite-based safety device for use in remote locations

If you have staff or contractors working off the grid, stay in touch with InReach SE+. The InReach SE+ is a rugged, satellite-based safety device for use in remote environments where cellular coverage is unavailable or unreliable. The InReach SE+ tracks the progress of the person carrying the device, providing visibility and peace of mind throughout the time spent in the field.

Benefits

- Peace of mind when your staff are outside cellular range
- Increased safety for high risk lone workers and contractors
- Versatile communication with the ability to send free-form, 160-character text messages
- On-screen acknowledgment on the device when an SOS is received by Smartrak
- Easy location of the person carrying the InReach SE+ device by viewing GPS coordinates on Smartrak's map
- User friendly
- Colour screen and virtual keyboard with predictive text
- Intuitive LED indicator for satellite availability
- Audible message notification

How it Works

- Specifically designed for lone workers outside of cellular range
- Tracking and locating (at 10-minute intervals when moving and 30-minute intervals when stationary)
- In an emergency flip the SOS button cover on the right of the device to unlock the SOS button.

Key Features

- Satellite coverage via the Iridium® Network
- Send and receive text messages
- Long lasting internal rechargeable lithium battery for ultimate convenience and portability. Up to 100 hours of battery life in 10-minute tracking mode with a clear view to the sky
- The device can be linked to the Earthmate app on a mobile device
- Pairing InReach SE+ allows you to use your mobile device to send text messages from the Earthmate app
- Earthmate also allows you to download a map and view it on your mobile
- IP67 rated - Designed for maximum durability in harsh environments (waterproof, dustproof, impact-resistant)

Then press the button for three seconds to send an alert

- Select home screen icons to include messaging, tracking and SOS
- Send pre-set messages via this shortcut button and the Status Light flashes green when there is a new message waiting.
