

Shout TW

Military-grade, satellite-based tracking and alerts for high risk lone workers

Powered by Smartrak's Visual Intelligence Suite and the Iridium network, the touch screen Shout TW is a pocket-sized hand-held, global, two-way satellite messaging and personal tracking device. The Shout TW uses the Iridium Satellite network to send location reports, free text messages and emergency notifications, and provides the ultimate peace of mind for 'off the grid' staff and the managers who are responsible for their safety.

Benefits

- Provides the highest level of Health and Safety compliance for lone workers, and is EMC and SAR compliant
- Ability to communicate with staff even when they are outside of cellular coverage
- Reliable, military-grade hardware means reduced likelihood of breakage and confidence in use
- Free-text messages for communication outside of cellular coverage

How it Works

- The Shout TW can be programmed to automatically send a position report at set intervals (once a minute through to once a day)
- When the emergency button is pushed, an alert is sent via the Smartrak's map which can be monitored in-house or by a 3rd party
- Allows users to send free-text messages via the on-screen keyboards, enabling communication when outside of cellular reception
- Can send pre-defined messages, which are stored in memory, saving costs by transmitting compressed communications
- Let's users send and/or save a GPS location that a user wants to identify and mark with a specific name tag for future reference
- Allows a quick check-in message to be sent using a single key

Key Features

- IP67 rated - Designed for maximum durability in harsh environments (waterproof, dustproof, impact-resistant)
- Ultra-low power consumption and large 1.95 Ah Li-Ion battery allows a position report to be sent every hour for up to two months
- Guarded panic alert button to avoid accidental alerts
- High-resolution colour touch screen and intuitive user interface
- Rechargeable battery with USB connection and AC adaptor for ease of charging
- Global coverage on the Iridium network

Includes:

- Lanyard
- USB Charging Cable
- AC Adaptor
